WYOMING EMS APPROVED MEDICATIONS
Current as of August 22, 2012

In 2011 the Wyoming Board of Medicine approved a new scope of practice for paramedic level services. ***Paramedic services functioning under this scope must be identified and approved by the Office of EMS. All other paramedic services should refer to the column "2008-EMTP" to determine their approved medications.***

Intermediate level services must be approved by the OEMS to utilize medications.

Zofran	Verbal Order Only	Approved	Approved

Additional Provisions:

- Authorized paramedic services functioning under the 2011 scope of practice, may develop local protocols for the monitoring and maintenance of drip medications that do not appear in the above table.

- In the absence of any complicating factors, any level of service may transport a patient utilizing a Patient Controlled Anesthesia (PCA) pump, or automated insulin delivery pump.
