

Release Notes (What's New?)

Improvements in V5.11.11

Login Screen

Upon login, users will notice a new logo and a new message display

End User License Agreement (EULA) and Terms of Use

Once users are logged in, they will be prompted to accept the new “End User License Agreement (EULA) and Terms of Use”

Document Center

After accepting the EULA, users can see another innovation to the latest release: the **Document Center**. This new functionality allows the WyIR administration to provide information to users within the WyIR homepage. The message display upon the login screen will prompt the users to access any updated material.

State Reports – WY Official Record of Immunization

The School Report Form (i.e., Official Record of Immunization) has been changed to no longer show the PPD test and subsequent results. The PPD Test and results will now only display upon the Wyoming Medical Record Report.

Bug Fixes in V5.11.11:

Reminder / Recall

Corrected an issue where Reminder Recall was not showing "B" for booster shots under dose number column on the "Patient Recall Group Listing" screen. Now booster shots will show "B" for dose number, just as they do on the patient Vaccine Forecast screen.

Vaccinations

Changed the Vaccine Forecast to show "B" for dose number if the patient is at least 21 years of age at the forecasted vaccination's due date; otherwise, the actual dose number shows.

Vaccinations

Corrected an issue where the Physician/Vaccinator drop-down on "Vaccination Add Detail" screen was not displaying the list in alphabetical order.

Vaccinations

Changed the DTaP footnote from: *DTaP or DT should be given to patients under 7 years of age. Td should be given to patients over 7 years of age. Patients over the age of 11 should receive one dose of Tdap.*

This footnote is now replaced with: *DTaP or DT should be given to patients under 7 years of age. One dose of Tdap should be administered to under-immunized children \geq 7 years of age or as a booster dose. Td should be administered when appropriate.*

Bug Fixes in V5.11.9 -

Reports - Vaccination Totals Report

Added parameters to limit by patient birth date, gender, and age.

Reports – WyVIP Accountability Log

HPV now displays both bivalent and quadrivalent columns.

Lot Numbers (using barcodes)

The “Scan Sheet” option now displays correctly.

Reports-Lot Number Summary Report

Fixed an issue where Lot Number Summary Report was not calculating correctly when the subtraction reason was “Administered chose not to be in the registry.”

Bug Fixes in V5.11.7-

Lot Numbers/Bar Code Scan Sheet

Fixed Lot Number Scan Sheet PDF Preview page to correctly display lot numbers when added and to correctly handle removal of lot numbers from the available list.

Reminder/Recall

Fixed intermittent issues where a patient with the “Block Recall” flag checked was still showing up on the Reminder/Recall results.

Contact Us

Resolved an issue with the Contact Us page that could result in a Java exception stack trace being displayed to the user.

Patients - Demographics

Changed “Gender” to “Sex” upon application

Mass Immunizations – Waiting Room

Fixed an issue where opening a patient from the “Waiting Room” displayed two “Save” buttons. This will now only display one Save button.

CMS 1500 Reports

Resolved an issue with CMS 1500 Reports that was causing the PDF to be cached by the client’s browser. Offices should now be able to bill for Medicaid and Medicare payments through the WyIR.
