Required	CSH TIER ASSESSMENT WORKSHEET (CSH-2)
	<b>Purpose:</b> To assist the PHN Care Coordinator to determine the level of care and care coordination activity needed by the family.
	The PHN Care Coordinator will determine what tier level is most appropriate for the client in each area.
	The score is based on assessment data obtained from forms and interaction with the client.
	To assist care coordinator in assessing level of needed intervention and outcomes.
	The score for each area assessed is recorded, and then added to determine the total score. The total score will determine the tier level.
	Completed by: PHN Care Coordinator
	When: After visit is completed
	<b>Retention:</b> Original form in local CSH record. For an initial application, the tier is recorded to the state on the CSH-1. The tier level update recorded on annual update sheet and sent to state.
	Updated: Per tier standard or PRN
