PUBLIC HEALTH RESPONSE MATRIX.....	16

PURPOSE - The Wyoming Department of Health (WDH) Emergency Operations Plan (EOP) provides a framework to ensure a systematic, unified approach for responding to public health, behavioral health, and medical incidents and non-public health incidents that fall within the authority of WDH and incidents or events that fall under the jurisdiction of the Wyoming Office of Homeland Security (WOHS).

This EOP complies with the standards articulated in the National Response Framework (NRF) and National Incident Management System (NIMS), including employment of an Incident Management Team (IMT) - one team specific to public health, behavioral health, and medical incidents or events (IMT-PH), and a second team for incidents that are agency specific (IMT-A) - based on the principles of the Incident Command System (ICS).

SCOPE - This EOP is applicable to all Cheyenne-based programs and field operations, with the exception of the five WDH facilities – which are responsible for developing emergency plans and support documents required by facility mission, or accreditation and/or regulatory agencies and submitting to their respective Senior Administrators for review and approval.

SITUATION OVERVIEW - Analyses conducted by WOHS, and published in the Wyoming Threat Hazard Identification Risk Assessment (THIRA) 2013 indicates one or more of these natural and manmade hazards may affect Wyoming:

- Animal Disease (Agro-terrorism)
- Armed Assault Improvised Explosive Device (IED)
- Hazardous materials and waste
- Human Pandemic
- Sabotage (Radiological)
- Tornadoes
- Wildland fire

Public Health Threats – Situations or conditions identified by the State Health Officer (SHO) in consultation with the County Health Officer (CHO) of the affected county/counties, the State Epidemiologist, and others as determined by the SHO, as a threat to the public's health.

Agency Threats – Situations or conditions identified by the Director, first responders, or employees as posing an imminent, or current threat to the health and safety of WDH employees and visitors, or threat of loss or damage to WDH property.

PLANNING ASSUMPTIONS AND CONSIDERATIONS

Assumptions

Emergency medical systems (EMS) within the affected area(s) will be overwhelmed in a matter of minutes.

An incident may require transportation of patients by air (rotary- or fixed-wing).

Structural damage will stop or reduce operations at health care facilities.

Ambulatory and seriously injured patients and the "worried well" will overwhelm facilities that remain in operation.

Crisis counseling for survivors and emergency responders will be a high priority.

Interstate support through the Emergency Management Assistance Compact (EMAC) will be required.

Disruption of sanitation services and facilities, loss of power, and high density of people in shelters may increase the potential for disease and injury.

Massive increases in demand will lead to short supply of medical and pharmaceutical supplies and equipment. Disruption in local communication and transportation systems could prevent timely re-supply.

Persons requiring maintenance medications (e.g., insulin) may have difficulty acquiring them due to damaged or destroyed supply locations and shortages within the disaster area.

Persons with higher needs, such as people with disabilities, may require additional assistance or resources.

Considerations

Natural disasters may result in secondary events such as the release of chemical, biological, and/or radiological materials; or other secondary hazards (e.g., fires) which may result in toxic environmental and public health hazards.

A criminal/terrorist incident may involve use of a secondary device against first responders, or healthcare facilities, resulting in additional casualties and/or a further reduction of available infrastructure.

Explosions, release of toxic gas or radiation, or biological release may produce large concentrations of specialized injuries that will overwhelm local jurisdictions' personnel and/or medical facilities and medical providers, thus eliminating, or reducing the ability to continue aid services.

A significant natural or technological disaster that overwhelms the affected local jurisdiction would necessitate both state and federal public health and mental health and medical care assistance.

WDH provides statewide coordination for public health, medical services, behavioral health and Vital Statistics Services (VSS) through [the State's] Emergency Support Function (ESF) #8 - Public Health and Medical Services.

WDH will support local health departments by coordinating requested supplies, equipment, and personnel through Web Emergency Operations Center (Web EOC), the State Operations Center, State Health Operations Center (SHOC), Epidemiologic Response Center (ERC), or a combination of centers.

A disaster in any of the adjacent states may cause an influx of fleeing victims with delayed onset of signs and symptoms to enter Wyoming.

Morgue capacity throughout Wyoming is limited.

CONCEPT OF OPERATIONS - The WDH Director or his/her designee will activate this EOP when one or more of these conditions exists:

- When directed by the Governor, and in coordination with WOHS, in preparation for declaring, or having declared a public health emergency, as authorized by Wyoming Statute (W.S.) § 35-4-115 (a) (i)
- When requested by WOHS in response to or in preparation to respond to an incident or an event that has, or may, overwhelm the public health, medical, and behavioral health capabilities of the affected county/counties
- At the request of the SHO based on an emerging, or existing public health or medical (including behavioral health) incident
- At the request of the Director based on an emerging, or existing incident that may, or has, affected any WDH facility (owned or leased)

Upon activation of the WDH EOP, the WDH Director or his/her designee will:

- Determine the need for activation of IMT-A or IMT-PH based on the situation. **Note:** IMT-A will be alerted and assembled if activation of the Continuity of Operations Plan (COOP) is required
- Assemble and brief Senior Management (and the appropriate IM if an IMT is activated)
- Determine if the SHOC and/or ERC should be activated, and at what level - see respective Standard Operating Guides (SOG)
- Consult the SHO on need for the Strategic National Stockpile (SNS) or other medical countermeasures (MCM)
- Notify WOHS Duty Officer of EOP activation (Not required when WOHS has requested EOP activation)

ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES - WDH is responsible for implementing and maintaining, or coordinating with state (intra- and inter-), and federal agencies, the essential services of public health (assessment, policy development, assurance) and medical services through the functional areas identified in Emergency Support Function (ESF) #8 - Public Health and Medical Services, of the National Response Framework (NRF):

- Assessment of public health/medical needs
- Health surveillance
- Medical surge
- Health/medical/veterinary equipment and supplies
- Patient movement
- Patient care
- Safety and security of drugs, biologics, and medical devices
- Blood and tissues
- Food safety and defense
- Agriculture safety and security
- All-hazards public health and medical consultation, technical assistance, and support
- Behavioral healthcare
- Public health and medical information
- Vector control

- Guidance on potable water/wastewater and solid waste disposal
- Mass fatality management, victim identification, and decontaminating remains
- Veterinary medical support
- Assessment of public health/medical needs
- Health surveillance
- Medical surge

WDH Senior Management and their respective divisions will be prepared to support emergency operations, individually and collectively.

WDH facilities will be prepared to provide emergency administrative and logistical support when required by the WDH Director or his/her designee.

General Responsibilities

WDH Administration and divisions will develop and maintain checklists to guide activities and actions during a response. The Public Health Emergency Preparedness (PHEP) Unit will, when requested, assist in developing checklists, with final approval residing with the division's senior administrator. At minimum, checklists should:

- Provide for the notification/recall of personnel and the establishment and maintenance of 24-hour operations capability as necessary
- Describe how the division will carry out responsibilities and tasks assigned in this plan, including the coordination of actions with the SHOC
- Provide for training and participation of personnel in activities and exercises relating to the EOP and its annexes and appendices
- Provide for maintenance and annual review of internal/external resources that are necessary to carry out assigned tasks

Specific Responsibilities

WDH ADMINISTRATION

WDH Director -

Through the Deputy Director, Senior Administrators and SHO, with technical assistance from the PHEP Unit, is responsible for ensuring all aspects of WDH's emergency preparedness, and response, including final approval of personnel assigned to fill IMT positions for IMT-PH and IMT-A.

Director's Unit on Policy, Research, and Evaluation (DUPRE) - Perform support functions as assigned

Chief Financial Officer (CFO) -

- Perform support functions as assigned
- Establish and maintain a disaster cost/reimbursement tracking system
- Establish a system to process emergency purchase/procurement requests for supplies, equipment, and services in support of emergency response efforts
- Coordinate (pre-incident) emergency fiscal activities with the State Auditor's Office (SAO)

Deputy Director - With guidance and support from the Director, the Deputy Director is responsible for coordinating all aspects of agency preparedness for evacuation and other life safety activities, as well as Continuity of Operations (COOP), and Pandemic Influenza Continuity of Operations (PICOOP). Essential planning and response activities include, but are not limited to:

- Establish (with technical assistance from the PHEP Unit), staff, lead, and train IMT-A for agency specific, COOP, and Continuity of Government (COG) incidents
- Coordinates with the Department of Enterprise Technology Services (ETS) to ensure that IT and telecommunications systems are functional 24/7/365
- Responsible for all aspects of preparedness in the areas that he/she directly supervises

➤ Public Information Officer (PIO) -

- Perform support functions as assigned
- Coordinate and disseminate health information, Crisis and Emergency Risk Communication (CERC), and follow-on information as determined by the WDH Director or his/her designee
- Conduct other Risk Communications activities as determined by the WDH Director or his/her designee
- Serve as the primary point of contact (POC) for media outlets and reporters
- Coordinate messages for dissemination through the Emergency Alert System (EAS) with PHEP and WOHS
- Serve as the WDH representative to the Joint Information Center (JIC)
- Coordinate development and dissemination of employee advisories with Human Resources (HR) and senior management
- Coordinate activities and releases with and for county public health
- Oversee WDH Hotline
- Review and update CERC annually, with support from PHEP Unit

➤ Health Insurance Portability and Accountability Act (HIPAA) - Perform support functions as assigned

➤ Human Resources (HR) -

- Perform support functions as assigned
- Coordinate placement, training, and tracking of temporary emergency assignments of WDH personnel, with division and office administrators, and PHEP; and ensure compliance with applicable personnel laws
- Work with the Departments of Administration and Information and Workforce Services to ensure temporary assignments and Worker's Compensation claims comply with governing laws and rules
- Coordinate development and dissemination of employee advisories with PIO
- Coordinate incident related mental health for WDH employees

➤ Vital Statistics Services (VSS) -

- Perform support functions as required
- Capture death data for later entry and updating of the VSS Electronic Database
- Coordinate with local authorities to manually capture and retain (for later data entry)
 - Birth record worksheet data
 - Death records worksheet data
- Provide mobile independent (laptop & scanner) data capture and entry for vital events records as they occur

- Update the State VSS Database when circumstances allow

PUBLIC HEALTH DIVISION

Senior Administrator/SHO -

- With guidance and support from the Director, the Senior Administrator/SHO is responsible for coordinating all aspects of agency preparedness for response to public health and medical emergencies
- With technical assistance from the PHEP Unit, establish, staff, lead, and train an IMT-PH
- Inform senior administrators of Behavioral Health and Aging divisions and State Medicaid Medical Officer of public health and medical emergencies, and request a representative for the IMT Operations Section to manage their respective response activities (see Public Health Response Matrix on page 16)
- Update Senior Management during public health and medical emergencies; include the following topics
 - On-going activities
 - Unmet needs
 - Support required for constituent services
 - Support required for SNS, SHOC, ERC, or Hot Line
- Assessment of Public Health/Medical Needs - In coordination with, and support from WOHS, mobilize and deploy ESF #8 personnel to support regional, or county teams to assess public health and medical needs, including the needs of at-risk population groups, such as language assistance services for limited English-proficient individuals and accommodations and services for individuals with disabilities. This function includes the assessment of the health care system/facility infrastructure. (Basis for this description is Emergency Support Function (ESF) #8 – Department of Homeland Security, January 2008, Washington, D.C.)
- Health Surveillance - In coordination with supporting departments and agencies, enhance existing surveillance systems to monitor the health of the general and medical needs population; carry out field studies and investigations; monitor injury and disease patterns and potential disease outbreaks; and provide technical assistance and consultations on disease and injury prevention and precautions. (Basis for this description is ESF #8 – Department of Homeland Security, January 2008, Washington, D.C.)

State Epidemiologist -

- Provide scientific and medical oversight of epidemiological activities concerned with public health. Oversee and coordinate epidemiological activities, and provide information and recommendations for possible courses of action to the SHO.
- Review data compiled by epidemiologists to determine possible effects on special needs, medically at-risk and UTSE population groups

State Public Health Veterinarian - Serve as a liaison with animal health and regulatory officials in Wyoming and ensure coordination of animal health and human health activities as appropriate

State Medicaid Medical Officer - Provide consultation and technical advice, and serve as backup as requested by the SHO

Units:

- Chronic Disease and Maternal Child Health Epidemiology Unit - Perform support functions as assigned by the State Epidemiologist
- Chronic Disease and Substance Abuse Prevention Unit- Perform support functions as required
- Communicable Disease Unit- Perform support functions as required
- Immunization Unit -
 - Assist with acquisition of vaccines and drugs
 - Ensure functionality of Wyoming Immunization Registry (WyIR)
- Infectious Disease Epidemiology Unit -
 - Perform surveillance and investigations as outlined in the Epidemiology Response Plan
 - Coordinate response activities and information sharing with public health laboratory, and WDH divisions as warranted by the situation
 - Direct disease control operations, to include epidemic intelligence, evaluation, prevention and detection of communicable diseases
 - Provide technical assistance to the PIO for development of health advisories, information, and instructions
 - Provide advice to SHO on environmental health activities concerning waste disposal, refuse, food, water control, and vector control
- Maternal and Child Health Unit -
 - Provide technical assistance and guidance on response actions, services, and shelters that may be required for women, children and families
 - Coordinate program specific enrollment functions with Division of Healthcare Financing (HCF) to ensure adequate surge capacity for possible new clients. Coordinate with other divisions providing services to special needs, medical at-risk and unable to self-evacuate (UTSE) populations to ensure full spectrum of collaboration and care – including surge capacity for new client enrollment
- Office of Emergency Medical Services (EMS) -
 - Develop, implement, and manage statewide EMS and healthcare organization surge (mobilization and demobilization) plans to coordinate supplies, equipment, and personnel
 - Manage coordination of requests for Federal emergency air and ground medical transportation and emergency medical services with Health and Human Services (HHS), Region VIII, Regional Emergency Coordinators (RECs)
 - Utilize appropriate systems to maintain situational awareness for WDH (HAxBED, Trauma registry, EMS system, etc.)
 - Utilize the Wyoming Activation of Volunteers in Emergencies (WAVE) to call up volunteers for counties/groups with the system and based on needs
 - Emergency licensing of EMTs
 - Track potential healthcare pharmaceutical, equipment, supplies shortages or needs
 - Provide equipment (ruggedized tablets, printers, computers, etc.) for use during response
 - Maintain vehicles and radio capability for use in WDH response
- Public Health Emergency Preparedness (PHEP) Unit –
 - Manage SHOC and ERC, and maintain radio communications for both

- Facilitate the coordination of supplies, equipment, and personnel as requested
 - Facilitate coordination of assistance in mass fatality incidents with coroner(s)
 - Coordinate and use all available WDH resources during an incident or event
 - Maintain and utilize Essential Personnel Survey (EPS) database
 - Plan for and ensure availability of tactical communication systems
 - Coordinate messages to be disseminated through the Emergency Alert System (EAS) with PIO and WOHS
 - Coordinate EMAC requirements with WOHS
 - Serve as contact for HHS, Region VIII, Regional Emergency Coordinator (REC)
 - Ensure alert and notification systems, and reporting systems are operational 24/7
 - Coordinate maintenance of communication and reporting systems with ETS, and SHOC
 - Coordinate and manage all facets of the Strategic National Stockpile (SNS), CHEMPACK, state stockpile, and other medical countermeasure (MCM) activities
 - Maintain list of nurse volunteers through Board of Nursing (BON) Memorandum of Understanding (MOU)
 - Coordinate ESF #8 activities with WOHS
 - Coordinate and manage WDH Public Health Responder Health and Safety Guidance and supplies
- Public Health Laboratory -
- Coordinate laboratory testing, sample collection, sample packaging, and sample transport with clinical labs and first responders
 - Perform testing when possible, or coordinate with other reference laboratories to provide testing - advise State Epidemiologist and ERC of test results
 - Support other WDH epidemiological requirements
- Public Health Nursing -
- Perform functions assigned by the SHO or CHO or designated WDH IM in support of response efforts
 - Coordinate supplies, equipment, and personnel as requested
- Rural and Frontier Health Unit-
- Coordinate federally funded Community Services Block Grant (CSBG) requirements with affected counties
 - Reimburse low-income end stage renal disease (ESRD) clients and vendors as a payer of last resort; and provide organ and tissue donor information to the public
 - Pre-incident: Identify and coordinate translation and interpreter services with PHEP Unit
 - Incident: Work with Planning Section Chief and Logistics Section Chief to identify and coordinate translation and interpreter services
 - Maintain list of dialysis centers
 - Perform support functions as assigned
- Women, Infants and Children Program (WIC) - Perform support functions as required

BEHAVIORAL HEALTH DIVISION

Senior Administrator -

- Responsible for coordinating all aspects of preparedness within the division, and across department lines with the other WDH divisions; based on guidance from the Director, and in consultation with the SHO
 - Develop, coordinate, and implement a comprehensive emergency response plan that addresses all aspects of mental health, behavioral health, substance abuse services, as well as emergency services for practitioners and participants in the programs for persons with developmental disabilities and those who work with individuals with an acquired brain injury (ABI)
 - Coordinate with SAMHSA's Disaster Technical Assistance Center (DTAC)
 - In the case of an Individual Disaster Declaration by the President, assess the need for a Crisis Counseling Assistance and Training Program (CCP) grant and other assistance opportunities from FEMA. Coordinate the CCP application and program
 - Coordinate requests for support for and from the Wyoming Life Resource Center (WLRC) and Wyoming State Hospital (WSH)
 - Provide guidance to the PIO on development, and dissemination of messages to caregivers, family members, and service providers that fall within the division's scope of responsibility
- Mental Health/ Substance Abuse -
- Perform support functions as assigned
 - Coordinate full continuum of mental health care as requested by local officials, and with the advice and consent of the SHO, including Critical Incident Stress Management (CISM), and on-going assessments of care needs for responders and survivors
 - Develop, implement and manage statewide mental health and substance abuse surge (mobilization and demobilization) plans to coordinate supplies, equipment, and personnel as requested through Emergency Management Assistance Compact (EMAC)
 - Assist residential treatment centers with evacuation requirements as warranted by the situation and requested by the local jurisdiction
 - Coordinate full continuum of substance abuse care as requested by local officials
- Developmental Disabilities (DD) -
- Perform support functions as assigned
 - Communicate with customers that may have a role in response, or been affected by the incident or event
 - Monitor actions and activities related to care of persons with disabilities in the affected area(s), including, but not limited to, sheltering, feeding, medical care required and available, and evacuation requirements

DIVISION OF HEALTHCARE FINANCING

Medicaid -

- Develop, implement, and manage surge plans for an increase in applications for Medicaid and other healthcare programs
- Coordinate program specific enrollment functions with Community Health Section (CHS) to ensure adequate surge capacity for possible clients
- Coordinate with other divisions providing services to special needs, medical at-risk and UTSE clients to ensure full spectrum of collaboration and care – including surge capacity for new client (Medicaid) enrollment

Pharmacy Services - Provide consultation and technical advice as requested, and support SNS operations

Kid Care CHIP Eligibility – Ensure continuation of determination and application processing for families without insurance

DIVISION ON AGING

Senior Administrator -

- Responsible for coordinating all aspects of preparedness within the division, and across department lines with the other WDH divisions; based on guidance from the Director, and in consultation with the SHO
- Develop, coordinate, and implement a comprehensive emergency response plan that addresses all aspects of emergency services for practitioners, providers and clients who provide or receive services, or funding from the division
- Coordinate emergency mental health, behavioral health, substance abuse services, for aging clients with the Behavioral Health Division
- Coordinate requests for support from Cheyenne-based operations to the Wyoming Pioneer Home (WPH), Wyoming Retirement Center (WRC), and the Veterans Home of Wyoming (VHW)
- Serve as the POC for requests that WPH, WRC, and VHW may have for Cheyenne-based operations
- Provide guidance to the PIO on development, and dissemination of messages to caregivers, family members, and service providers that fall within the division's scope of responsibility

➤ Community Living -

- Communicate with customers that may have a role in response, or have been affected by the incident or event
- Provide guidance to the PIO on development, and dissemination of messages to the elderly who are at risk
- Monitor actions and activities related to care of elderly, including, but not limited to, sheltering, feeding, medical care and evacuation requirements
- Coordinate supplies, equipment, and personnel as requested

➤ Licensing and Surveys –

- Provide technical and other support as appropriate or legally required for establishment of an emergency medical shelter
- In coordination with ETS, OEMS, and PHEP, establish a call center to contact health centers affected by a disaster
- Ascertain degree of damages and capabilities that continue to exist to healthcare facilities in the affected area(s)
- Establish a strike team in conjunction with local building code officials, to survey the affected area and conduct on-site damage assessments

DIRECTION, CONTROL, AND COORDINATION –

Upon activation of the WDH EOP, the Director or his/her designee will exercise one of three options for managing WDH's response:

- Option 1 - Retain control and manage the response
- Option 2 - Delegate responsibility to a subordinate without activating an IMT
- Option 3 - Activate the appropriate IMT, with the IM activating Command Staff and General Staff Sections as warranted - see Figure A. WDH IMT Structure. Upon assembly and initial briefing, the IMT will develop the initial Incident Action Plan (IAP) to cover the first 12-hour period based on situation-specific information received from the SHO or Deputy Director

Figure A. WDH IMT Structure

Upon activation of the IMT, SHOC, ERC, or request for the SNS, the Director or his/her designee will notify Senior Administrators of the place and time for support personnel to assemble for situation briefings and duty/shift assignments.

The Virtual Situational Awareness Tool (VSAT) and Web EOC are the principal systems for sharing and managing information, maintaining situational awareness, and developing a common operating picture. Figure B reflects the lines of communications during an activation of local and state entities.

Figure B. Lines of Communications during an Activation of Local and State Entities.

WDH response measures may include direct support in the form of epidemiologists, the public health laboratory, and public health nurses; or indirect support, e.g., facilitating coordination of services, equipment, supplies, and personnel from sister state agencies, private enterprise, community voluntary agencies, individuals, other states, and resources from the Federal government.

COMMUNICATIONS -

- Emergency Public Information and Risk Communications – See PIO
- Tactical Communications – See PHEP

ADMINISTRATION, FINANCE, AND LOGISTICS – See Deputy Director, Fiscal Services, and Human Resources (HR)

PLAN DEVELOPMENT AND MAINTENANCE - The PHEP Unit is responsible for:

- Assisting with development, coordination, and implementation of WDH EOP, annexes, appendices, and any SOGs or checklists determined to be necessary through exercise, training, or actual events
- An exercise program that prepares WDH for response to all hazards, based on WDH plans
- Ensuring WDH plans are reviewed and updated annually, in addition to when:
 - An emergency, exercise, or drill reveals the need for plan modifications

- The department organizational structure changes

DEFINITIONS -

Command Staff: "... the Command Staff consists of the Incident Command and the special staff positions of Public Information Officer, Safety Officer, Liaison Officer, and other positions as required, who report directly to the Incident Commander. They may have an assistant or assistants, as needed." (NIMS, Department of Homeland Security, Washington, D.C., December 2008)

General Staff: "... normally consists of the Operations Section Chief, Planning Section Chief, Logistics Section Chief, and Finance/Administration Section Chief." (NIMS, Department of Homeland Security, Washington, D.C., December 2008)

Emergency Operations Center (EOC): "The physical location at which the coordination of information and resources to support incident management (on-scene operations) activities normally takes place." (NIMS Online Glossary) Note: WDH has named its EOC the State Health Operations Center (SHOC).

Incident Command System (ICS): "A standardized on-scene emergency management construct specifically designed to provide an integrated organizational structure ..." (NIMS Online Glossary)

National Incident Management System: A set of principles that provides a systematic, proactive approach guiding government agencies at all levels, nongovernmental organizations, and the private

sector to work seamlessly...in order to reduce the loss of life or property and harm to the environment." (NIMS Online Glossary)

National Response Framework: "A guide to how the Nation conducts all-hazards response." (NIMS Online Glossary)
