General procedures for admission (These vary by location):

- Client usually must have recent ASI & ASAM that recommend residential treatment.
- Most centers require a recent basic physical and TB test.
- There are wait lists at every center. But the actual wait varies depending upon other intakes, exits, staffing and other factors.
- Most of these facilities have a sliding-fee scale with cost based on ability to pay. Please see <http://health.wyo.gov/mhsa/treatment/SlidingFeeScale.html>
- Community centers can help a client navigate into an appropriate residential treatment center. Working closely with the current counselor is important to help transition into residential treatment. To find a community center, visit <http://health.wyo.gov/mhsa> and click on the Services Locator.
