Infectious Disease Epidemiology Program

Summary of West Nile Virus Activity in 2011

County	Human WNF Cases	Human WNND Cases	Positive Mosquito Pools	Mosquito Pools Tested
Albany	1		0	34
Fremont		1	0	52
Goshen	1		10	109
Teton			0	87
TOTAL	2	1	10	282

Counties not listed did not report any West Nile Virus activity.

Abbreviations above are West Nile Fever (WNF) and West Nile Neuroinvasive Disease (WNND).

This year the WDH received the fewest reports of human West Nile virus infection since the introduction of the disease in 2002. In regards to the human cases reported this year, 33% were female, 67% were male. The age range of patients reported was from 22 to 64 years old with a median age of 47 years. Reported symptom onset dates ranged from 7/3/2011 through 9/6/2011. No human deaths associated with West Nile Virus infection were reported this year.

For questions, comments or to report West Nile Virus activity, please contact Emily Thorp, Surveillance Epidemiologist, at (307) 777-8634 or Emily.Thorp@health.wyo.gov.
