

# HOT SPRINGS COUNTY MENTAL HEALTH FACT SHEET

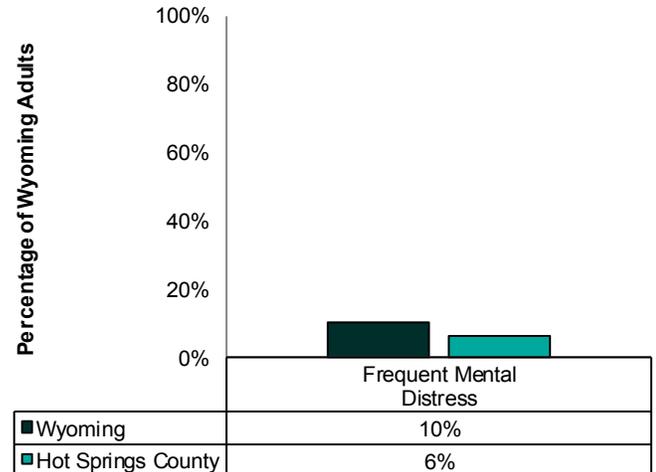

## WYOMING STATE EPIDEMIOLOGICAL OUTCOMES WORKGROUP

### COUNTY AND STATE HIGHLIGHTS

- Hot Springs County percentages were combined with Niobrara County in BRFSS reporting for some measures. Therefore, these indicators are not available for the current Hot Springs County fact sheet.
- The 2007 to 2011 combined year average in Hot Spring county had the third highest rate of Wyoming adults reporting that their mental health was not good for 14 or more of the past 30 days (10% vs 6% statewide).
- Since 2000, the suicide rate in Wyoming has been nearly two times the national average (22 vs. 12 in 2010).

### FREQUENT MENTAL DISTRESS

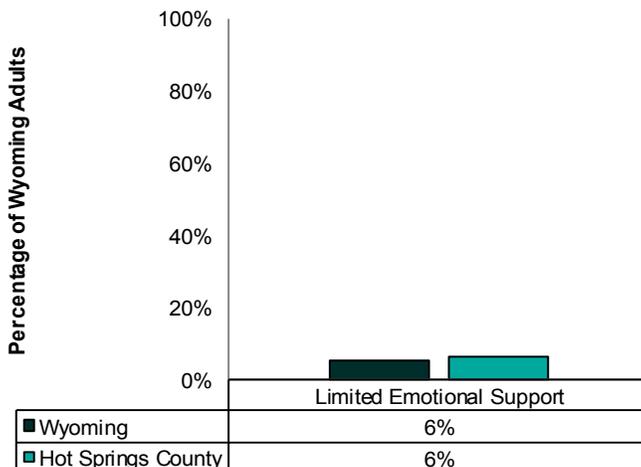

**Definition:** The percentage of Wyoming adults reporting their mental health (which includes stress, depression, and problems with emotions) was not good for 14 or more of the past 30 days.

Data Source: Behavioral Risk Factor Surveillance System, 2007-2011

### LIMITED EMOTIONAL SUPPORT

**Definition:** The percentage of Wyoming adults reporting they rarely or never get the social or emotional support they need.

Data Source: Behavioral Risk Factor Surveillance System, 2007-2010
