

Protect your home against *Mosquitoes*

Mosquitoes can develop in any standing water that is present for more than five days. To reduce the mosquito population around your home and property, eliminate all standing water and debris. Here are some spots where water can collect or where poor maintenance can cause problems.

Pool cover that collects water, neglected swimming pool, hot tub or child's wading pool

Birdbath (clean weekly) and ornamental pond (stock with fish)

Broken down vehicle, garden equipment, any toy or container that can hold water

Water trough (refresh regularly)

Clogged rain gutter (home and street)

Drain Standing Water

Junk and discarded tires (drill drain holes in tire swings)

Tree rot hole or hollow stump

Missing, damaged or improperly installed screens

Leaky faucet or pet bowl (change water daily)

Uncovered boat or boat cover that collects water
