Column Name: Expended

Year: 2012

Field Note:

In previous years, a formula was devised to capture PHN time not already used as a match and then translated to dollars. As with last year, in an attempt to be consistent from year to year, we use the total state general funds allotted to MCH plus the Newborn Screening funds expended for our MOE. Due to cuts to state general funds, we have used general funds expended for infant immunizations to meet the MOE.

Data from 2011 are NOT COMPARABLE to data from previous years. WIC IT staff worked to correct the data query used to collect these data, and the data for 2011 are accurate. Data from previous years are not reliable. Data were not available from Pediatric Nutrition Surveillance System (PedNss), so data were collected directly from the Wyoming WIC program. The Wyoming WIC program collects data for children with a BMI >95th percentile for age and gender. State level aggregate data were confirmed with the Wyoming WIC program.
