

# ALBANY COUNTY MENTAL HEALTH FACT SHEET

## WYOMING STATE EPIDEMIOLOGICAL OUTCOMES WORKGROUP

### COUNTY AND STATE HIGHLIGHTS

- For the 2007 and 2009 combined year average, Albany County had the highest rate of people reporting that they were receiving treatment for a mental health condition or emotional problem (17% vs statewide average of 12%).
- For the 2007 to 2010 combined year average, Albany County ranked fourth lowest for the percentage of adults reporting they rarely receive or never get the social or emotional support they need (4% vs. the statewide average of 6%).
- Since 2000, the suicide rate in Wyoming has been nearly two times the national average (22 vs. 12 in 2010).

### FREQUENT MENTAL DISTRESS

**Definition:** The percentage of Wyoming adults reporting their mental health (which includes stress, depression, and problems with emotions) was not good for 14 or more of the past 30 days.

Data Source: Behavioral Risk Factor Surveillance System, 2007-2011

### SERIOUS PSYCHOLOGICAL DISTRESS

**Definition:** The percentage of Wyoming adults with a total score of 13 or above (out of a possible 24) based on responses to six mental health questions.

Data Source: Behavioral Risk Factor Surveillance System, 2007 & 2009

### ACTIVITY LIMITATION

**Definition:** The percentage of Wyoming adults reporting activity limitations due to mental or emotional problems.

Data Source: Behavioral Risk Factor Surveillance System, 2007 & 2009
