

This fact sheet provides a quick snapshot of substance use and problem behavior data as well as Risk and Protective Factors from the 2016 Prevention Needs Assessment. Data presented is from 6<sup>th</sup>, 8<sup>th</sup>, 10<sup>th</sup>, and 12<sup>th</sup> grade students in **Platte County**. The graphs below represent the 2016 results. The full statewide and county results can be found on the PNA website (<http://pnasurvey.org>).

### Lifetime Substance Use

WYOMING SURVEY & ANALYSIS CENTER

The PNA measures use of 13 substances. The chart displays the three most commonly reported substances used in each grade.

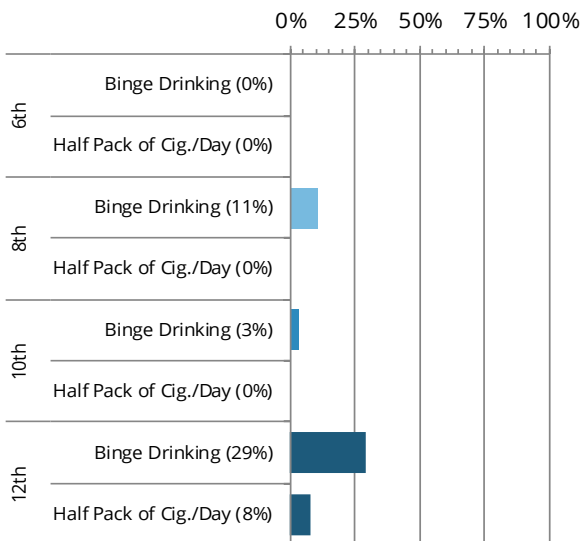

### 30-Day Substance Use

WYOMING SURVEY & ANALYSIS CENTER

The chart displays the three most commonly reported substances used in the last 30 days in each grade.

### Heavy Use

WYOMING SURVEY & ANALYSIS CENTER

The chart displays the reported rates for alcohol and cigarettes. Binge drinking is defined on the PNA as having five or more alcoholic drinks in a row sometime in the past two weeks.

### Problem Behaviors

WYOMING SURVEY & ANALYSIS CENTER

The PNA closely studies seven problem behaviors. The chart displays the two most commonly reported problem behaviors committed in the past 12 months.

**Risk Factors**

WYOMING SURVEY & ANALYSIS CENTER

A Risk Factor is an influence that increases the likelihood that students may participate in substance use or problem behaviors. The 2016 PNA measures 19 Risk Factors. The chart presents the three factors with the highest percentages of at-risk students in each grade.\*

**Protective Factors**

A Protective Factor is an influence that decreases the likelihood that students may participate in substance use or problem behaviors. The 2016 PNA measures three Protective Factors. The chart presents the factor in each grade with the lowest protection prevalence rate.
