DOH Verapamil 120mg
DOH Verapamil 240mg ER

Men's Health

Finasteride 5mg
Tamsulosin 0.4mg

90 Day Supply Program Details

1. The patient must have a *current* application on file with the Medication Donation Program. Applicants are eligible for one year and must renew annually. Renewal notices are sent to active patients one month prior to expiration.
2. The patient must have a *complete* application on file at the Medication Donation Program. This includes proof of income, proof of residency, and social security number which is used to verify prescription insurance status.
3. Medications labeled with "DOH" are NOT available for Medicare Part D patients. Medications listed without the "DOH" label ARE available to Medicare Part D patients.
4. Prescriptions using a substitute dosage are not eligible for 90 day supply. For example, if the patient needs atorvastatin 80mg daily and none are available, the prescription may be filled with directions to take two 40mg tablets daily. This will be filled for a 30 day supply.
5. The original Rx must be written for a 6 month supply or longer which indicates to our staff that the patient is stable on the medication.
6. Dispensing Sites cannot order the "DOH" medications to have on hand. However, their patients may access the "DOH" medications via the mail through standard WMDP procedures.
7. This formulary is subject to change. Changes will be posted on the website.
