

Poisoning Prevention (PP) Change Package

Common Aim

By April 2023, states and jurisdictions will decrease poisoning related fatalities, hospitalizations, and emergency department visits by 4% from the November 2018 baselines for children and adolescents ages 0 through 19, through the spread of evidence-based poisoning prevention strategies and programs.

Strategies	Measures
<p>1. Provide education on prescription drug misuse prevention to expectant and new mothers during prenatal, perinatal, and maternal care visits throughout the state or jurisdiction (e.g., anticipatory guidance, written materials, videos, online resources, etc.)</p>	<p>Number of organizations providing education on drug misuse prevention to expectant and new mothers</p> <p>Report the number of organizations monthly. Report the number of expectant and new mothers who receive education.</p>
<p>2. Work with hospitals, clinics, and community health centers to develop and implement protocols for screening expectant and new mothers for prescription drug misuse during routine prenatal, perinatal, and maternal care visits</p>	<p>Number of health care organizations developing and implementing protocols to screen expectant and new mothers for prescription drug misuse during routine prenatal, perinatal, and maternal visits</p> <p>Report monthly the number of health care organizations developing and implementing protocols for screening expectant and new mothers for prescription drug misuse during routine prenatal, perinatal and maternal care visits. Report the number of expectant and new mothers who are referred for treatment.</p>
<p>3. Implement and spread evidence-based programs to increase awareness about proper storage and disposal of prescription drugs, household cleaners, and toxic substances throughout the state or jurisdiction (e.g., National Prescription Drug Take-Back Day)</p>	<p>Number of organizations implementing evidence-based poisoning prevention education programs</p> <p>Report the number of organizations monthly. Report the name of the program(s) being implemented or spread. Report the number of individuals reached through the program(s).</p>
<p>4. Implement and spread education (e.g., anticipatory guidance, written materials, videos) on the services provided by poison control centers</p>	<p>Number of individuals receiving education (e.g., anticipatory guidance, written materials, videos) on the services provided by poison control centers</p> <p>Report monthly the number of individuals receiving education (e.g., anticipatory guidance, written materials, videos) on the services provided by poison control centers.</p>

Poisoning Prevention (PP) Change Package

Strategies	Measures
<p>5. Work with hospitals, clinics, and community health centers to ensure consistent use of Prescription Drug Monitoring Programs (PDMPs) throughout the state or jurisdiction (e.g. education to health care providers on PDMPs, organizational policy development, training on use of PDMPs, integration of PDMPs into electronic health records)</p>	<p>Number of health care organizations implementing practices to ensure consistent use of Prescription Drug Monitoring Programs</p> <p>Report monthly the number of health care organizations implementing practices to ensure consistent use of PDMPs. Report the type of practices being implemented. Report the number of health care providers receiving training and education on the use of PDMPs.</p>
<p>6. Implement and spread evidence-based drug misuse prevention programs for adolescents throughout the state or jurisdiction (e.g., Keepin' It REAL, Life Skills Training)</p>	<p>Number of schools and organizations implementing evidence-based drug misuse prevention programs</p> <p>Report monthly the number of schools and organizations implementing or spreading evidence-based drug misuse prevention programs. Report the name of the program(s) being implemented or spread. Report the number of adolescents receiving education. You may need to estimate this number (e.g., number of adolescents in the grades, schools, or organizations who are receiving drug misuse prevention programs).</p>
<p>7. Work with hospitals, clinics, and community health centers to ensure that health care providers give anticipatory guidance on the risks of prescription drug misuse during adolescent wellness visits</p>	<p>Number of health care organizations providing anticipatory guidance on the risks of prescription drug misuse during adolescent wellness visits</p> <p>Report monthly the number of health care organizations providing anticipatory guidance. Report the number of health care providers giving anticipatory guidance. Report the number of adolescents receiving anticipatory guidance.</p>
<p>8. Implement and spread evidence-based parenting/caregiving programs throughout the state or jurisdiction (e.g., Family Check-Up, Generation PMTO, Incredible Years, Strengthening Families for Parents and Youth 10-14, Triple P Positive Parenting Program®)</p>	<p>Number of organizations implementing evidence-based parenting/caregiving programs</p> <p>Report the number of organizations monthly. Report the name of the program(s) being implemented or spread. Report the number of parents/caregivers receiving education.</p>
