COUNTY REPORT OVERVIEW

This report provides an overview of Wyoming Medicaid performance by county to answer the following questions:

ENROLLMENT

How many county residents enrolled in Medicaid?

How does this compare to the rest of the state?

What % of total Medicaid enrollment comes from our county?

EXPENDITURES

How much does Medicaid spend on our county's enrolled members?

Where do our enrolled members receive services?

What % of their expenditures go to providers in other counties?

PER MEMBER PER MONTH

What is the PMPM cost for our county's enrolled members?

How does this compare to the rest of the state?

How does this PMPM breakdown by service category?

PROVIDERS

How many active providers did we have in our county?

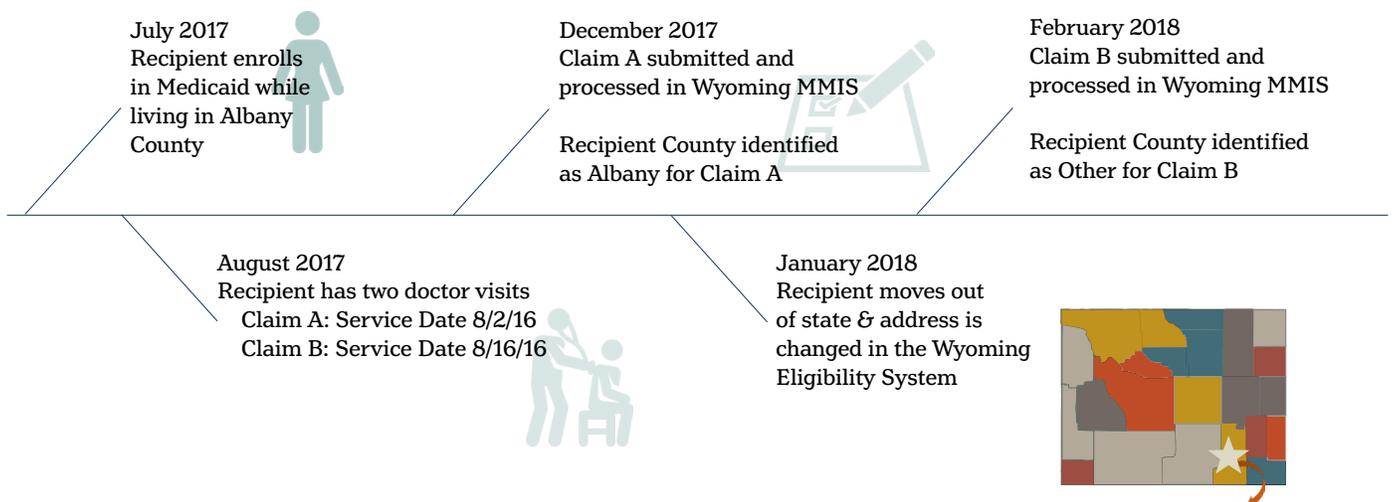

Which counties' residents do our providers serve?

What % of their expenditures come from outside the county?

DISCLAIMER

The recipient's county is assigned to each claim at the time the claim is adjudicated or processed in the MMIS. As providers have up to one year to submit claims for services rendered, a recipient may move – to a different county or out of the state – prior to the claim being processed. Therefore, claim expenditures by county may not accurately reflect where the recipient resided at the time of service, and the Per Member Per Month costs for counties should be considered approximates.

This also results in enrolled members and recipient expenditures being allocated to “Other” county. This is illustrated in the example below.

SFY 2018 SUMMARY

ENROLLMENT

ALL

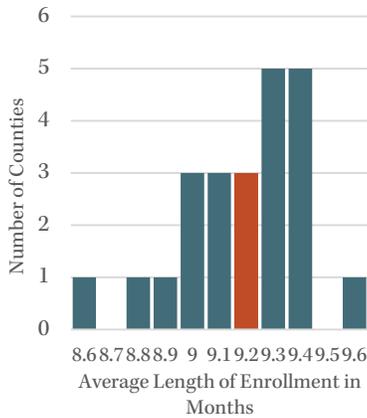

counties had a decrease in Medicaid enrollment in SFY 2018

9

counties had a percentage of population enrolled in Medicaid greater than the state average in SFY 2018

48%

of counties have an average enrollment length greater than the state average of 9.2 months

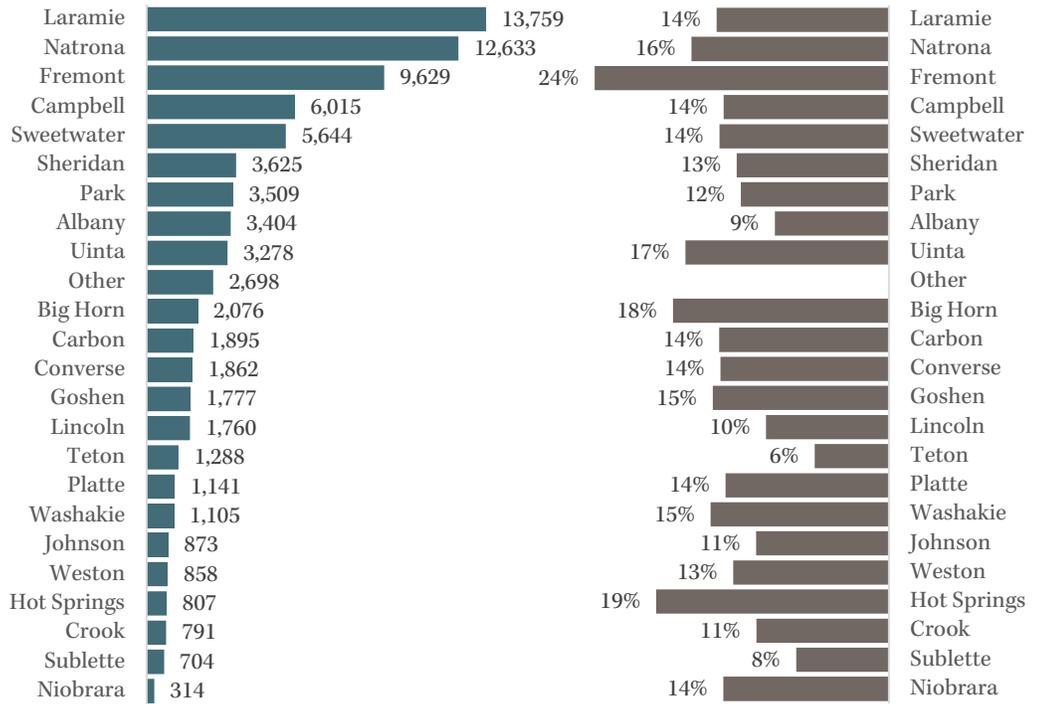

81,445

individuals enrolled statewide¹

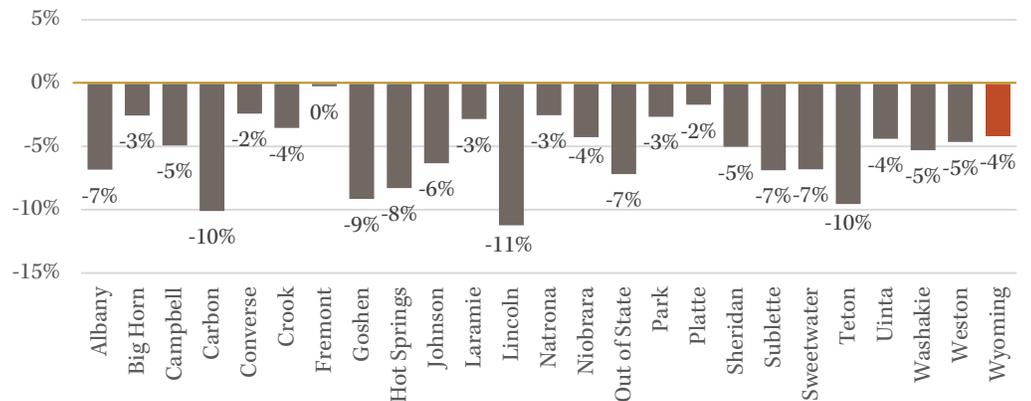

14.1%

of state population

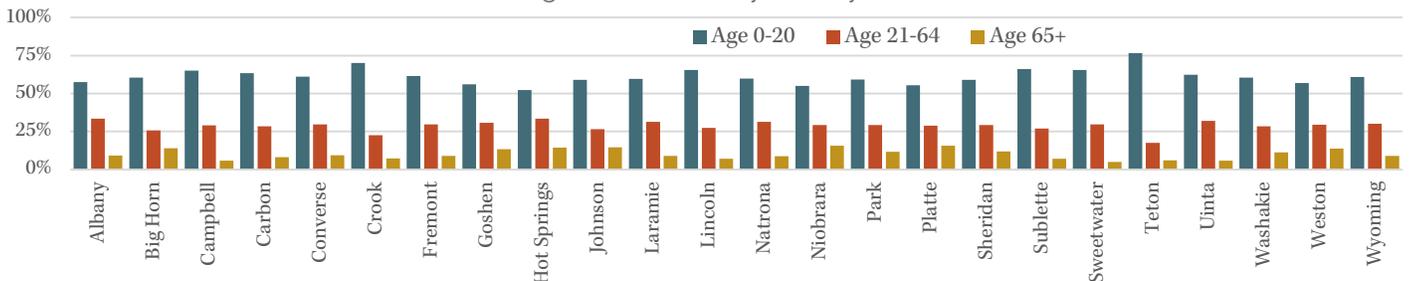

Medicaid Enrollment by County and Percent of County Population

One-Year Change in Medicaid Enrollment by County

Age Breakdown by County

¹ Medicaid enrollment in this report was calculated as of March 2018 and thus will not match figures reported in SFY 2018 Wyoming Medicaid reports published prior to this date.

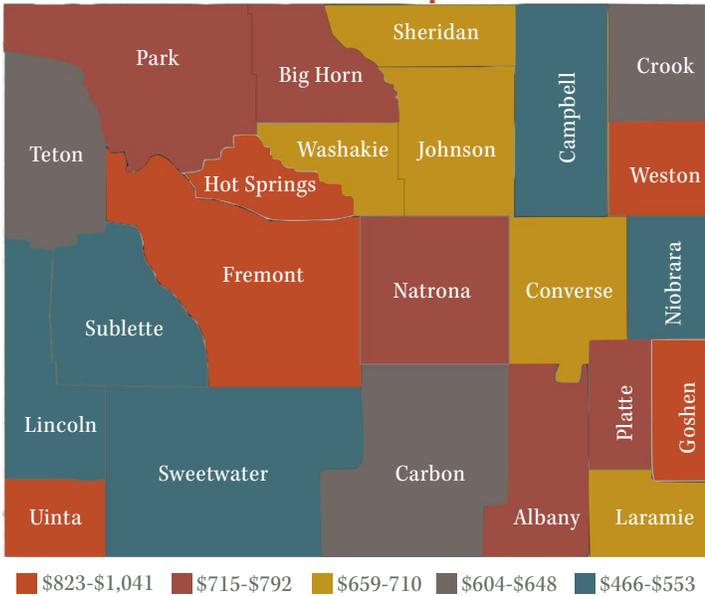

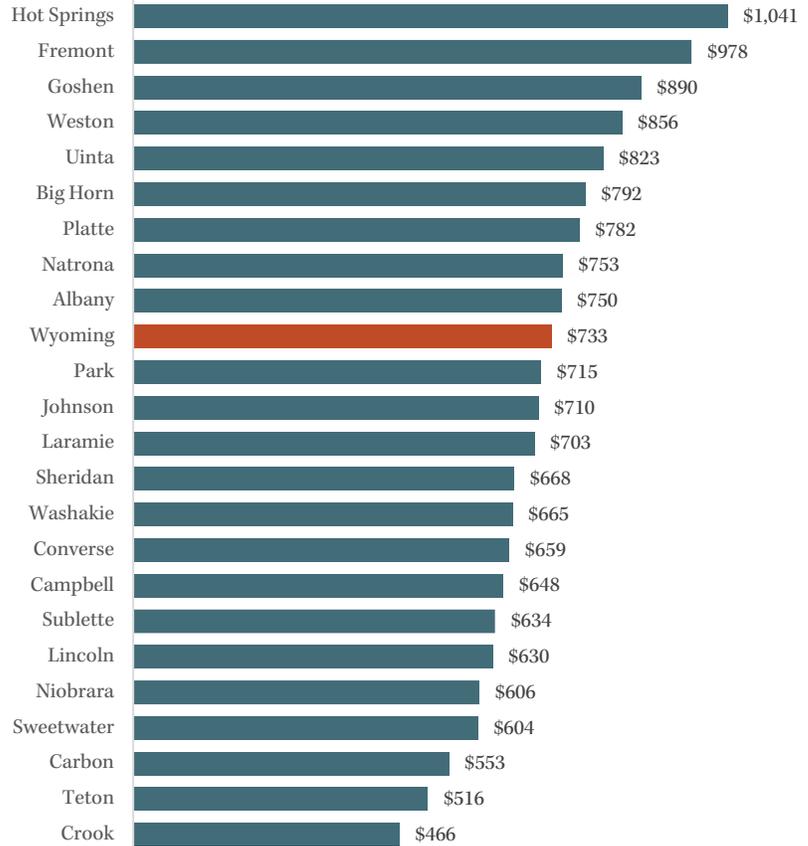

PER MEMBER PER MONTH

\$733
Wyoming Overall²

5
counties had a decrease
in PMPM in SFY 2018

65%
of counties had a
PMPM below the overall
Medicaid value in
SFY 2018

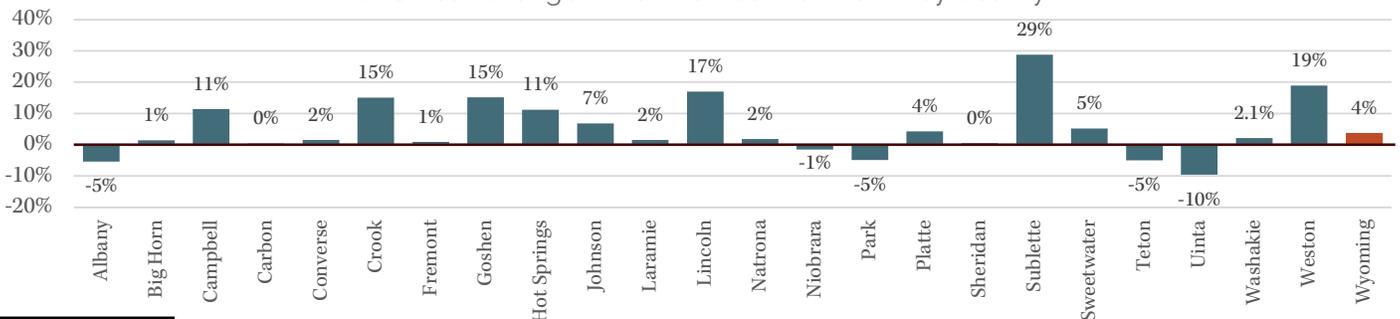

Per Member Per Month by County

16% of Fremont County's PMPM cost is due to Intermediate Care Facility for Individuals with Intellectual Disabilities services

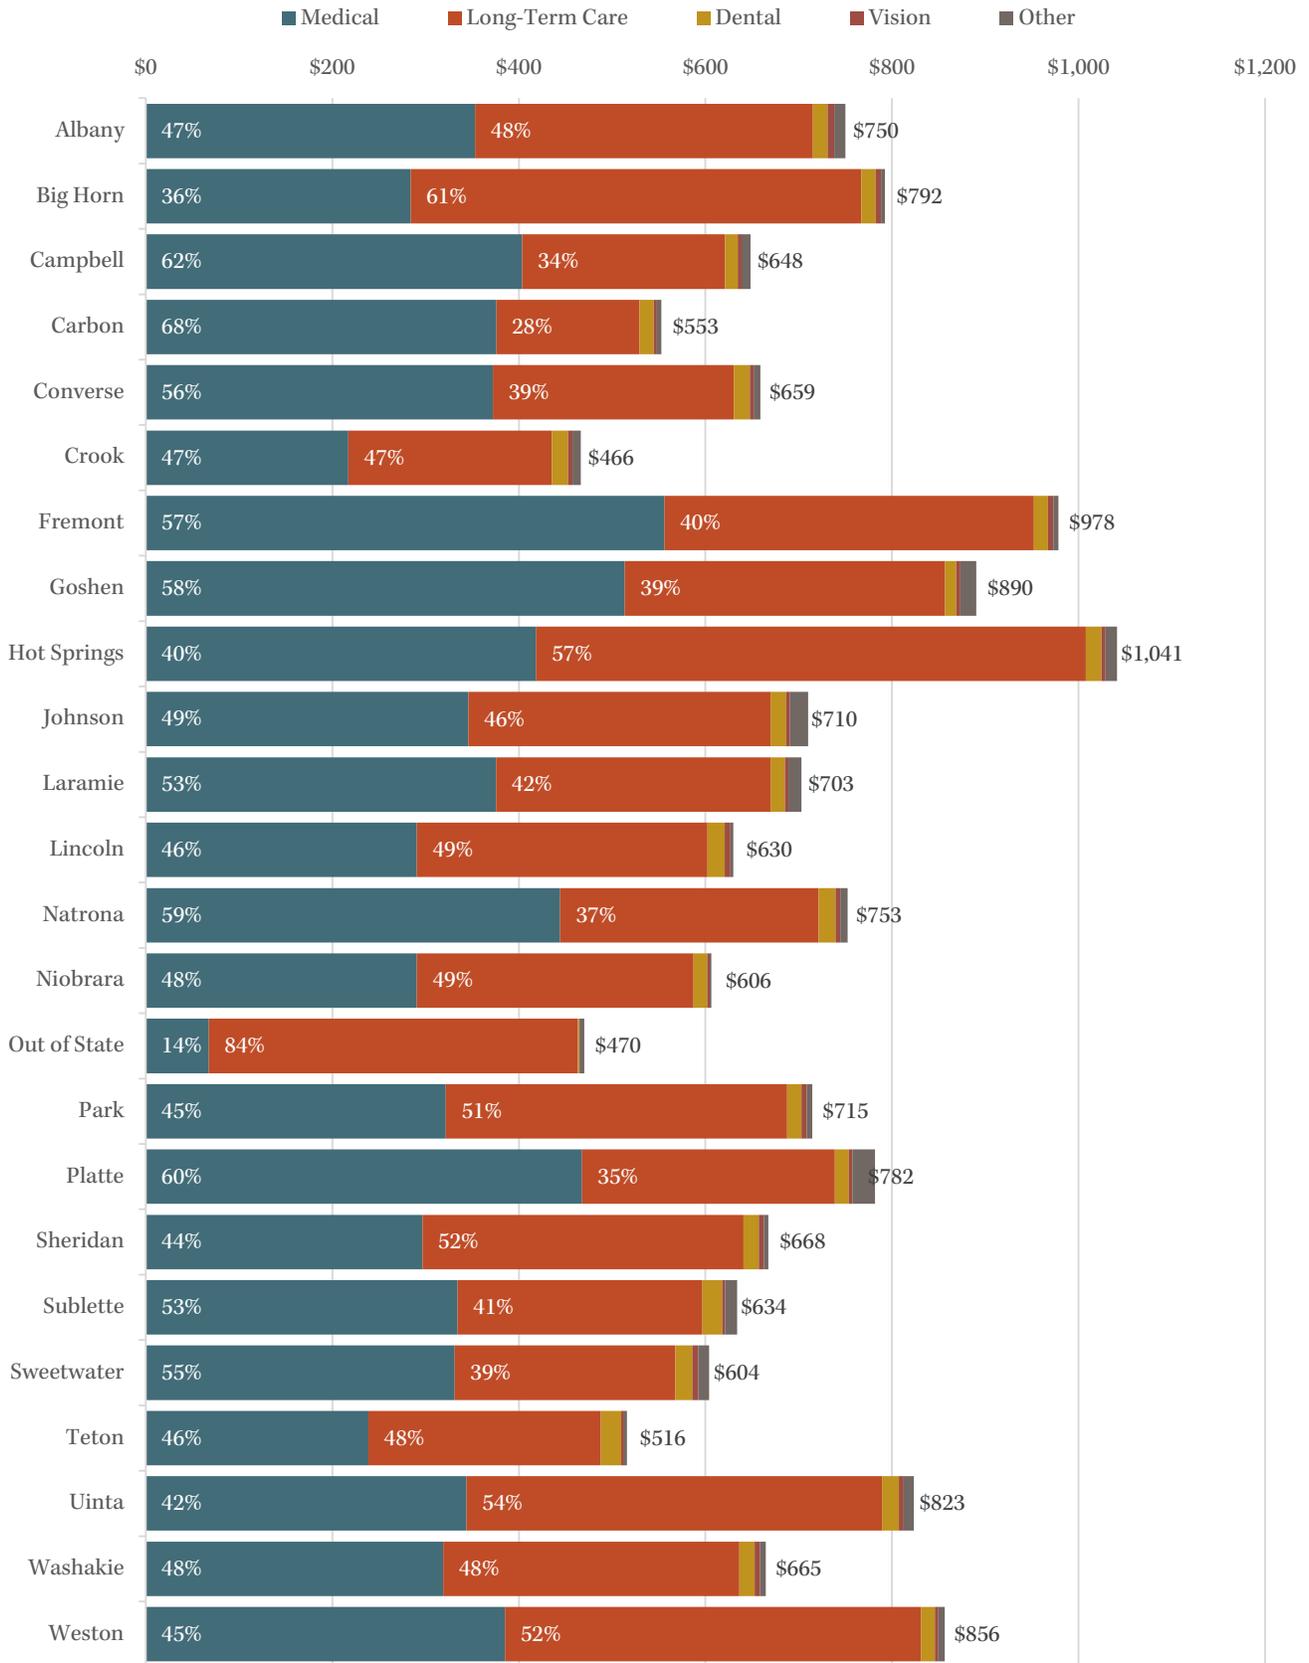

Excluding the Wyoming Life Resource Center expenditures lowers the PMPM for Fremont County to \$826

One-Year Change in Per Member Per Month by County

² Per Member Per Month costs for this report were calculated in March 2018, and thus will not match figures reported in SFY 2018 Wyoming Medicaid reports published prior to this date.

County Per Member Per Month by Service Category

DIAGNOSES OF CONCERN

8

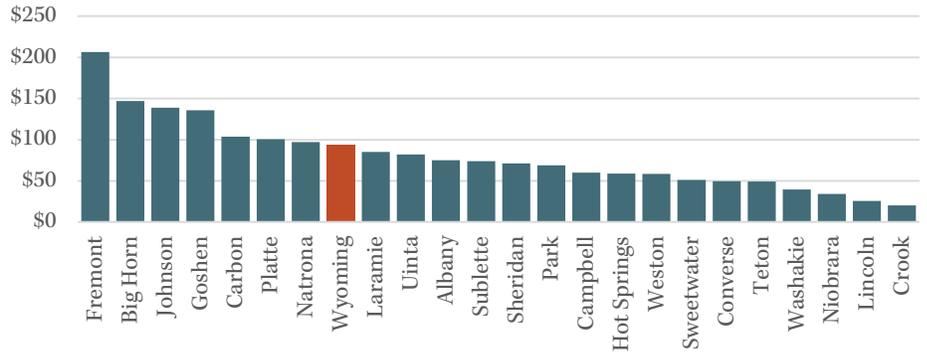

conditions highlighted to show PMPM cost comparisons by county

- Mental health
- Alcohol and Substance Abuse
- Suicide and Intentional Self-Inflicted Injury
- Diabetes
- Asthma and COPD
- Respiratory Infections
- Heart Disease
- Low Birth Weight and Short Gestation

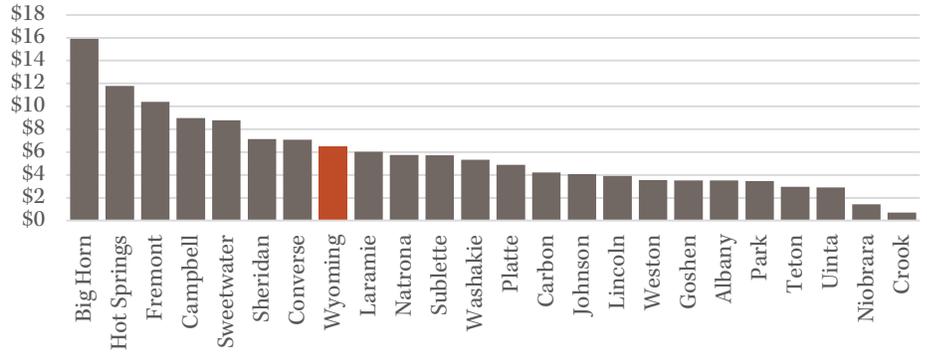

These conditions accounted for over **\$112 million** in expenditures³ and an overall PMPM cost of

\$149

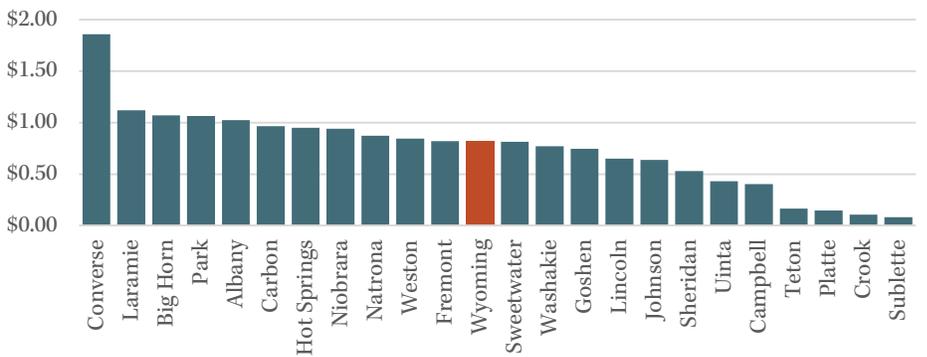

Mental Health

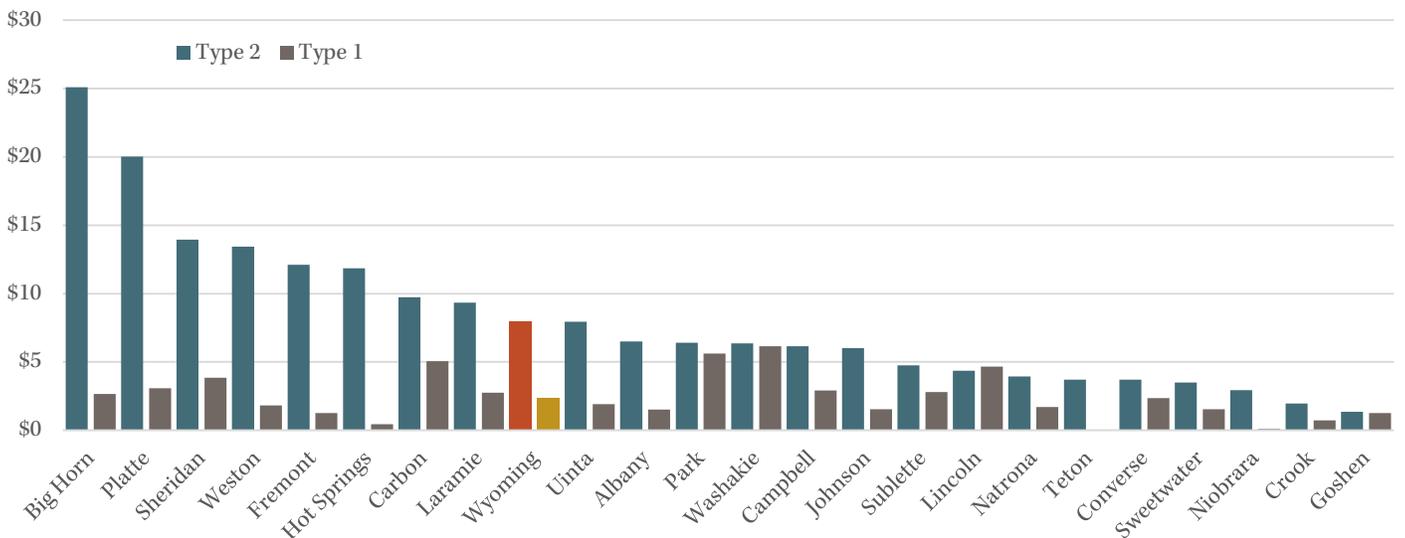

Alcohol and Substance Abuse

Suicide and Intentional Self-Inflicted Injury

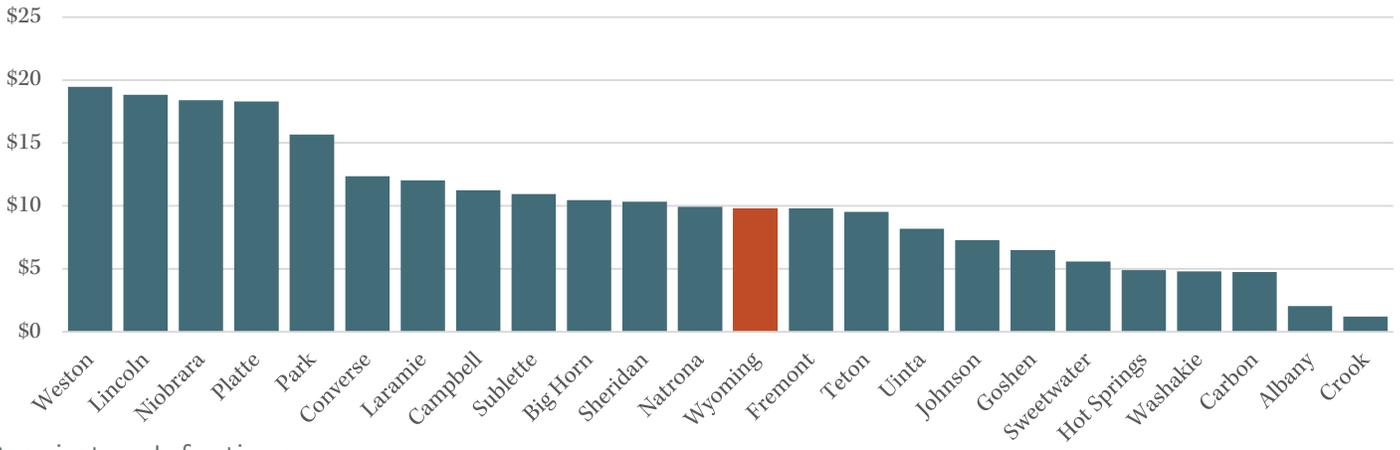

Diabetes

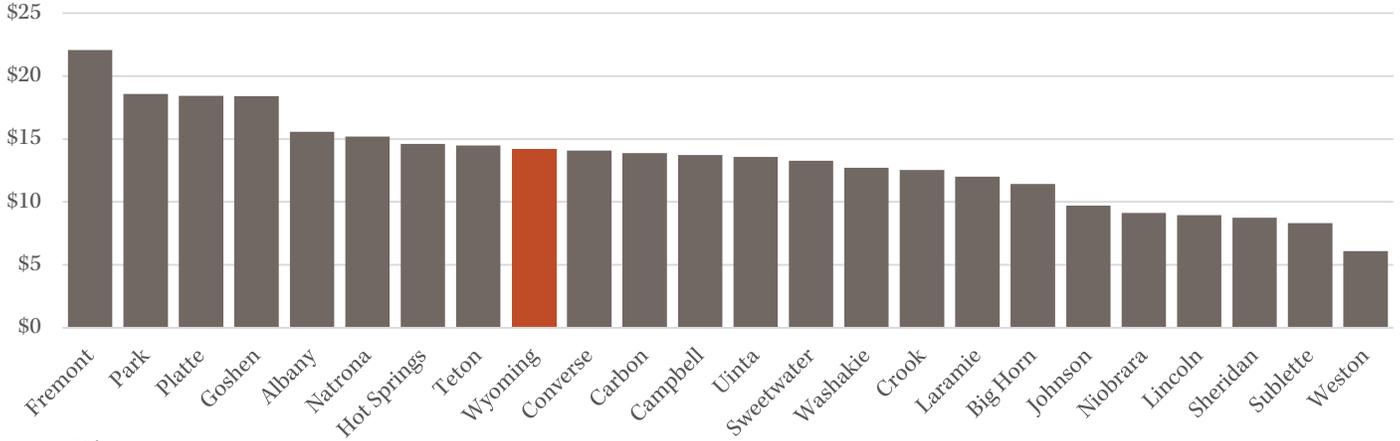

³ For the purpose of this report, diagnosis data is based on primary diagnoses only.

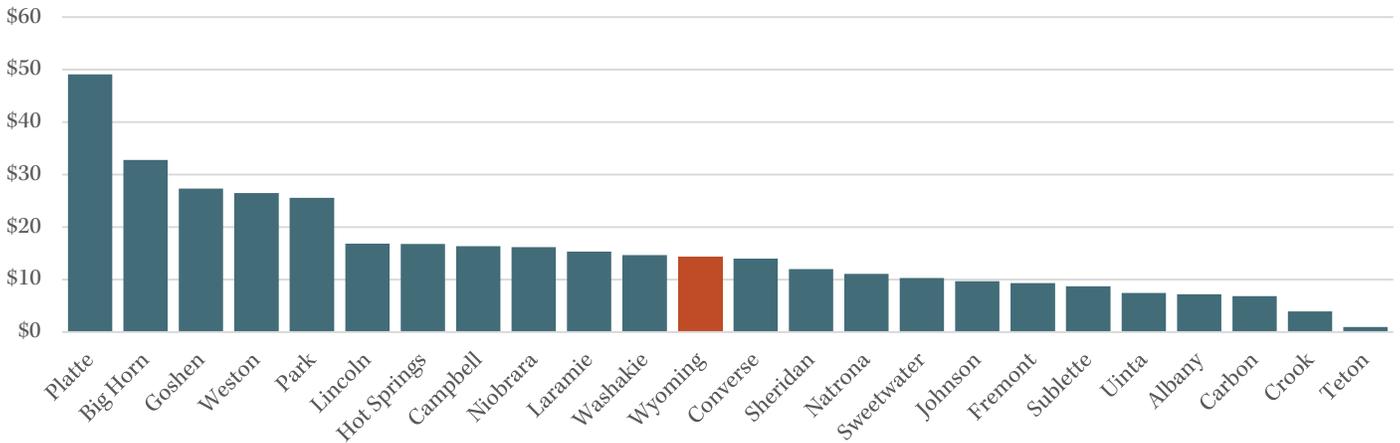

Asthma and COPD

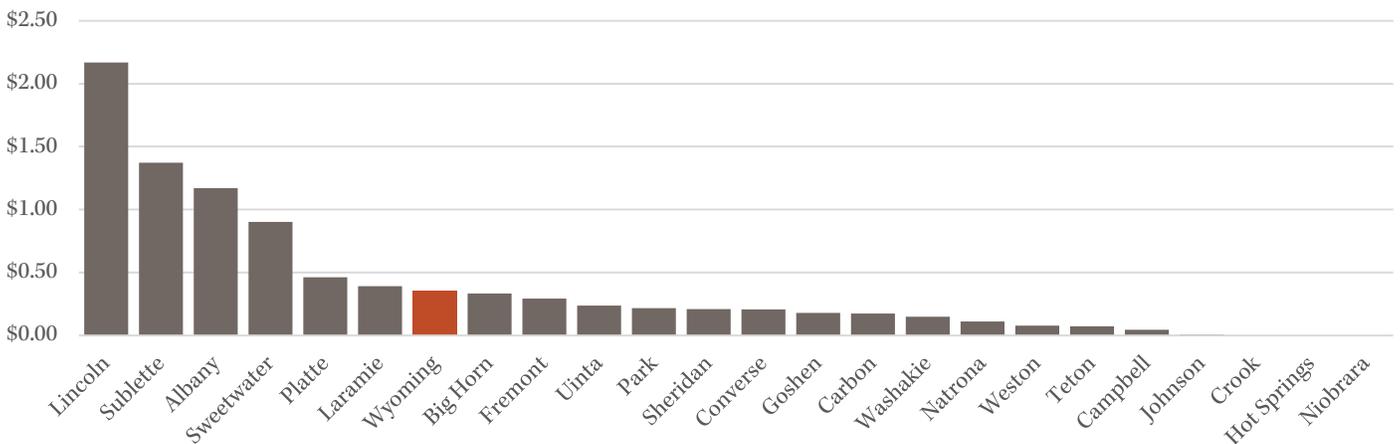

Respiratory Infections

Heart Disease

Low Birth Weight or Short Gestation

Emergency Room Utilization Rate by County
(per 1,000 member months)

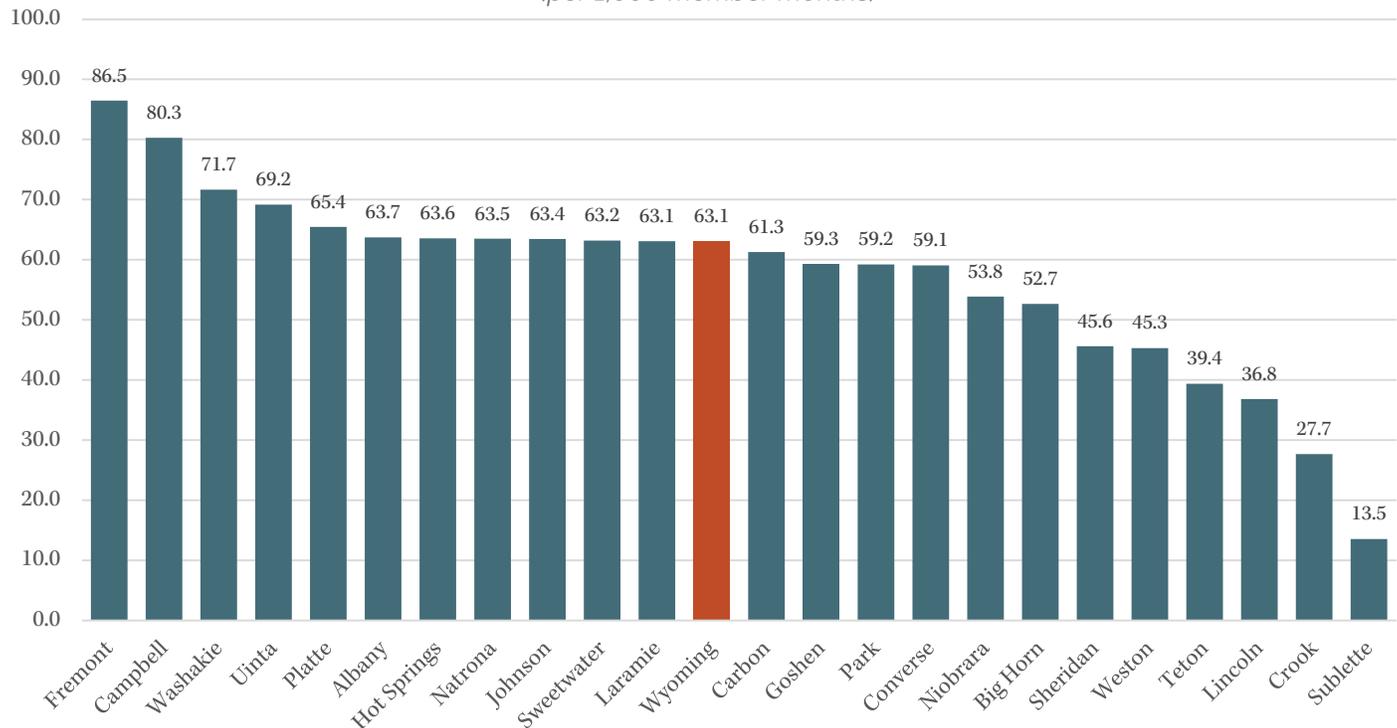

Table 1. Emergency Room Utilization by County - SFY 2018

Table 13 provides a complete view of where county residents receive services, allowing a comparison of how provider utilization differs between the various counties of residence. For instance, the table shows which counties have the greatest percentage of recipients who receive care from providers out of state. For SFY 2018 this was Weston County with 51%.

While most counties have the highest percentage of their recipients receiving services in their county of residence, one county does not: Crook county had more recipients receive care in Campbell county (58%) than within Crook county (49%).

Table 14 also shows service utilization flow, but from the provider county perspective. This allows us to see where a county's recipients are coming from, whether that is from within the same county, or from neighboring counties. For instance this table shows that the greatest percentage of recipients served by out of state providers come from Laramie, Natrona, and Fremont counties. So while Weston county residents had the greatest percentage of their recipients receiving care out of state (as seen in table 13), Weston county residents only accounted for 2% of recipients receiving care out of state.

While a majority of providers' recipients reside in the same county, one county's providers do not. Washakie county providers serve a greater number of recipients who reside in Goshen county (29%) than who reside in Washakie county (25%).
