This report provides agency administrators a count of low validity scores for the reporting period. Using the Report Writer report titled “Agency Low Validity Report” can help look for trends along with issues in completing EMS documentation. This can also help identify which providers may be struggling with this and identify where further documentation education can help. Through the use of the Report Writer, agencies may stay on top of either abandoned, duplicate, or incomplete patient care reports using the Agency Low Validity Report in the WATRS Elite Report. Additionally, in the View Existing EMS, EMS Incident Lists agencies may use the “Validity Low Score Search” list to identify low scores. Be sure clear the Unit Notified by Dispatch Date and enter the search parameter in the Created on Date/Time.

Agencies need to review, evaluate and correct records with poor validation scores.

Agencies are encouraged to call Jay Ostby at (307) 777-6023 or email at jay.ostby@wyo.gov with validity issues for further research.
