2019	33	10%	326	9%	284	11%	643	10%

Note 1: Low weight births include infants weighing less than 2500 grams. Please refer to the definitions and technical calculations on page 48 of this document.

Note 2: National data reports teens as 15-19; a small number of births to teens younger than 15 did occur but these are not reported.

Note 3: Percentages are based on the total number of births recorded in the year. Percentages are rounded and may not add to 100% due to rounding error.

Note 4: In a few rare cases, mother's age was not recorded; therefore, mother's age totals may not match total births reported in other tables.
