

Wyoming Cancer Program- Our Purpose

July 2023 - Wyoming Cancer Program Listening Session

Star Jones, CPM
Cancer and Chronic Disease Prevention
Unit Manager

CANCER

The image features the word "CANCER" in large, pink, foil balloons. Each letter is held up by a different hand, representing diverse individuals. The hands are visible from the wrist up, showing various skin tones, clothing, and accessories like a bracelet and a tattoo.

1 IN 8 WOMEN

in the United States will develop
breast cancer in her lifetime.

Colon Cancer At-A-Glance*

Colon cancer is the second leading cause of cancer-related death in the U.S.

On average, your risk is about 1 in 20, although this varies widely according to individual risk factors.

50+

90% of new cases occur in people 50 or older.

People with a first-degree relative (parent, sibling or offspring) who has colon cancer have two to three times the risk of developing the disease.

There are currently more than one million colon cancer survivors in the U.S.
