Quick Reference Guide: Search For a Patient

Last Revised: 02/2024

Search For a Patient

1. Log in to the Wyoming Immunization Registry (WyIR). Click "Patient" from the left side navigation menu, then click on "Search/Add."
2. Enter the search criteria – patient's name, date of birth, etc. Then, click "Search" or hit the "Enter" key on your keyboard.
3. Review the Search Results below; if the correct patient appears, click on the patient's name to view their demographic information.

Search Tips:

To complete a thorough search, first try searching by:

- Patient's first initial of first name, first initial of last name, and birth date;
- Patient's first initial of first name and date of birth;
- Patient's first initial of last name and date of birth;
- Patient's first and last names without a date of birth; or
- Statewide Immunization Information System (SIIS) Patient ID (a patient identifier unique to the Wyoming Immunization Registry).

  If the search results don't yield the patient you're looking for, reference the "Adding a New Patient" section on page 2.

NOTE: Patients can opt out of WyIR. Additionally, up until February 2018, reporting to the WyIR was not mandatory for healthcare providers. For both of these reasons, patients may not be found in the WyIR.
