

Quick Reference Guide: Vaccination Data Quality Detail Report

Last Revised: 07/2024

The vaccination quality detail report identifies patient and vaccination records that contain administered vaccinations that are outside of the recommended administration age; or administered vaccinations given from unspecified vaccine types. The report displays patient details such as name, WYIR patient identification number (SIISPATIENT ID), birth date, which vaccine or vaccine group caused the issue, and the issue description. The report also contains the name of the organization and facility where the vaccine was administered. All applicable vaccination warnings are included.

To navigate to the “Vaccination Data Quality Detail Report,” follow the steps below.

1. Select “Reports” from the main menu.
2. Select “Report Module.”
3. Under the “Quality” section, select “Vaccination Data Quality Detail Report.”

Vaccination Data Quality Detail Report July 25, 2024

This Vaccination Data Quality Detail Report is used to enable identification of the patient and vaccination records which were outside of the administration age or administered vaccinations that were given from unspecified vaccine types.

*Denotes an orphaned vaccination record. This ID is the patient's Medical Record Number as was imported with this vaccination by the registry. There is no associated patient record in the registry and, therefore, no SIIS Patient Number has been generated.

Vaccination Date Range: 01/01/2022 through 07/20/2022

Organization	SIIS Patient	Patient Name	Patient DOB	Vaccine Group	Issue	Vacc Date
IMMUNIZATION UNIT						
5006	746081	TEST, PATIENT	06/02/2014	DTaP-Hep B-IPV	DTaP or Ped DT administered at 7 years of age or older.	07/13/2022
