**Note 1:** Data is self-reported by mother at time of birth.

**Note 2:** Less than adequate care is defined as prenatal care starting in the fourth month and less than 80% of recommended visits. Adequate or better care is defined as prenatal care starting in the fourth month and 80% or more of recommended visits. Participants may have marked unknown to number or dates of prenatal visits, resulting in a small number of births without care ratings.

**Note 3:** National data reports teens as 15-19; a small number of births to teens younger than 15 did occur but these are not reported.

**Note 4:** In a few rare cases, mother's age was not recorded; therefore, mother's age totals may not match total births reported in other tables.
