PTSD Awareness Month

Pride Month

PTSD Awareness Month

Post Traumatic Stress Disorder (PTSD) Month helps to raise public awareness about PTSD, educate the public on the disorder, and provide support for those affected by PTSD.

There are currently about twelve (12) million people in the United States with PTSD, and most don't get the help they need.

Pride Month

Pride Month is recognized each June to reflect on the history of the LGBTQ community in the United States and the events that have shaped its path. The observance coincides with the anniversary of the 1969 Stonewall riots in New York City, a pivotal event that led to increased public awareness and community organization.

CDU Monthly Webinar: No Webinar for June

CDU HEROES

We want to thank all EpiTrax users for your time and patience during the EpiTrax transitions. We appreciate you!

Congratulations!

Shout out to our amazing PHN Liaison, Melanie Pearce, for twenty years of service!

+TB Tests and HIV Testing

As you know, there's a strong link between TB and HIV, and it's really important that all patients who test positive for TB are offered an HIV test on or after the date they receive their positive TB result. The national target for this measure is 95% or higher, and Wyoming's performance for 2024 was 86%, so we have room for improvement. While the CDU TB team has requested HIV test results for positive TB tests for quite some time, HIV testing will be a key measure in our TB Evaluation and Performance Management Plan (EPMP) for the 2025-2029 TB grant project period. Please make sure that anyone conducting TB tests is aware of this requirement and ensures that an HIV test is completed on or after the date of a positive TB result. Your hard work and attention to this matter are truly appreciated.

Putting Public Health Expertise Into Action

July 23, 2025 Webinar at 12- 1 p.m. CT, registration closes July 18, 11:59 p.m. CT
