Note 1: Data is reported by the hospital where the birth occurred.

Note 2: National data reports teens as 15-19; a small number of births to teens younger than 15 did occur but these are not reported.

Note 3: Percentages are based on the total number of births by mother's age recorded in the year.

Note 4: In a few rare cases, mother's age was not recorded; therefore, mother's age totals may not match total births reported in other tables.
