

## WyIR 2026-27 Influenza Vaccine Cheat Sheet

Products highlighted in blue are the seven presentations offered through WY Public Vaccine Programs (PVP) in 2026-27

| Product Name                         | Formulation                                    | Vaccine Name/Description in WyIR                                 | Age Indication           | CVX Code | NDC           | Vaccine Product Billing Code | Manufacturer Name                   | Manufacturer Code |
|--------------------------------------|------------------------------------------------|------------------------------------------------------------------|--------------------------|----------|---------------|------------------------------|-------------------------------------|-------------------|
| <b>Fluad</b>                         | 0.5-mL PFS                                     | Influenza, adjuvanted, trivalent, PF                             | ≥65 years                | 168      | 70461-0026-03 | 90653                        | Seqirus, Inc.                       | SEQ               |
| <b>Fluarix Trivalent</b>             | 0.5-mL PFS                                     | Influenza, split virus, trivalent, PF                            | ≥6 months                | 140      | 58160-0725-52 | 90656                        | GlaxoSmithKline Biologicals SA      | SKB               |
| <b>Flublok Trivalent</b>             | 0.5-mL PFS                                     | Influenza, recombinant, trivalent, PF                            | ≥9 years                 | 155      | 49281-0726-10 | 90673                        | Sanofi Pasteur Inc.                 | PMC               |
| <b>Flucelvax Trivalent</b>           | 0.5-mL PFS                                     | Influenza, MDCK, trivalent, PF                                   | ≥6 months                | 153      | 70461-0656-03 | 90661                        | Seqirus Inc.                        | SEQ               |
| <b>FluLaval</b>                      | 0.5-mL PFS                                     | Influenza, split virus, trivalent, PF                            | ≥6 months                | 140      | 19515-0822-52 | 90656                        | ID Biomedical Corporation of Quebec | IDB               |
| <b>FluMist Trivalent<sup>1</sup></b> | 0.2-mL prefilled single-use intranasal sprayer | Influenza, live, trivalent, intranasal, PF                       | 2 years through 49 years | 111      | 66019-0113-10 | 90660                        | MedImmune, Inc. (AstraZeneca)       | MED               |
|                                      | 0.2-mL prefilled single-use intranasal sprayer | Influenza, live, trivalent, intranasal, self/caregiver admin, PF | 2 years through 49 years | 333*     | 66019-0112-51 | NA*                          | MedImmune, Inc. (AstraZeneca)       | MED               |
| <b>Fluzone High-Dose<sup>2</sup></b> | 0.5-mL PFS                                     | Influenza, high-dose, trivalent, injectable, preservative free   | ≥65 years <sup>3</sup>   | 135      | 49281-0126-65 | 90662                        | Sanofi Pasteur Inc.                 | PMC               |
| <b>Fluzone Trivalent</b>             | 5.0-mL MDV (0.5 mL dose)                       | Influenza, split virus, trivalent, preservative                  | ≥6 months                | 141      | 49281-0645-15 | 90658                        | Sanofi Pasteur Inc.                 | PMC               |
|                                      | 0.5-mL PFS                                     | Influenza, split virus, trivalent, PF                            | ≥6 months                | 140      | 49281-0426-50 | 90656                        | Sanofi Pasteur Inc.                 | PMC               |

\*Self- or caregiver-administered at home

1. These presentations are only available through VFC, they are not available through the PVP for adults

2. Fluzone High-Dose is only available through the PVP for adults, it is not available through VFC

3. Patients age 18-64 years who have had a solid organ transplant and are on immunosuppressive medications can receive this vaccine
